INTERNATIONAL PRELIMINARY EXAMINATION REPORT

Intern	application No.
PCT	C/EP2003/01203

I. B	I. Basis of the report			
1. With regard to the elements of the international application:*				
[the inte	mational application as originally filed	
	X	the des	cription:	
ĺ "		pages	1-8 , as originally filed	
		pages	, filed with the demand	
		pages	, filed with the letter of	
ſ	\boxtimes	the clai		
"	لاے	pages		
		pages		
		pages	, as amended (together with any statement under Article 19	
		pages	, filed with the letter of	
[r	∇	the draw		
		the dra	·	
		pages pages		
		pages	, nied with the demand	
,			, filed with the letter of	
L] t		ence listing part of the description:	
		pages	, as originally filed	
		pages	, filed with the demand	
		pages	, filed with the letter of	
1	2. With regard to the language, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item. These elements were available or furnished to this Authority in the following language which is			
			guage of a translation furnished for the purposes of international search (under Rule 23.1(b)).	
			guage of publication of the international application (under Rule 48.3(b)).	
			aguage of the translation furnished for the purposes of international preliminary examination (under Rule 55.2 and/	
3.	With	regard minary e	to any nucleotide and/or amino acid sequence disclosed in the international application, the international examination was carried out on the basis of the sequence listing:	
1	\square	contain	ned in the international application in written form.	
	Щ		ogether with the international application in computer readable form.	
	Щ	furnish	ned subsequently to this Authority in written form.	
[Щ	furnish	ned subsequently to this Authority in computer readable form.	
	The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in tinternational application as filed has been furnished.			
	Ш	The st	ratement that the information recorded in computer readable form is identical to the written sequence listing has urnished.	
4.		The ar	nendments have resulted in the cancellation of:	
1			the description, pages	
			the claims, Nos.	
			the drawings, sheets/fig	
5.		This re beyond	port has been established as if (some of) the amendments had not been made, since they have been considered to go the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).**	
	* Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rule 70.16 and 70.17).			
**,	** Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report.

2. Citations and explanations

1. Reference is made to the following documents:

D1: WO-A-99/12672

D2: DE-A-2 200 212

2. Independent claim 1:

The subject matter of claim 1 is unclear owing to the use of the phrase "in a conveying system". This phrase does not make it clear whether claim 1 is directed to a transfer car or to a conveying system having a transfer car. The analysis is based on the following clarified wording of claim 1:

"Coil transfer car for a conveying system...".

D1, which is considered to be the closest prior art, discloses:

Coil transfer car for a conveying system for metal coils having a support which can be moved along a conveying section by means of a drive, comprising, on a base frame, means for raising and lowering a carrying saddle along a linear vertical guide, wherein there is arranged on the

base frame for linear vertical guidance purposes a scissors hoist.

The subject matter of claim 1 differs from D1 in that:

the base frame is substantially flat, and especially for this substantially flat base frame there is used a steel slab, and in that to raise and lower the carrying saddle there are disposed, to form the drive, two lifting cylinders which act directly on said saddle in a spaced-apart manner.

As a result of the direct action of the lifting cylinders on the carrying saddle, a favourable application of force and a linear lifting movement are achieved.

Although D2 discloses two lifting cylinders which act directly on an elevating platform to raise and lower a carrying saddle with a scissors hoist, the function of these two lifting cylinders is to incline the carrying saddle; for this purpose the scissors are also joined by means of elongated holes. Said document does not mention the problem of a more favourable application of force and a linear lifting movement. The subject matter of claim 1 is novel and inventive (PCT Article 33(2) and (3)).

3. Dependent claims 2 to 6:

The subject matter of claims 4 to 6 is unclear owing to the use of the words "commercially available" and "conventional".

Irrespective of this lack of clarity, claims 2 to 6 disclose further embodiments of the coil transfer car defined in claim 1 and their subject matter is therefore likewise novel and inventive (PCT Article 33(2) and (3)).

4. Further observations:

Contrary to the requirements of PCT Rule 5.1(a)(ii) neither the relevant prior art disclosed in D1 nor this document is indicated in the description.
